Book chapter review for G12 Introduction to Spatio-Temporal Databases

Tutorial: Was the chapter organization, content, illustrative examples suitable as a teaching material? If so comment on how it can be improved? (50 Words)

The book chapter was written clearly. The figures and graphs used in the chapter are also well designed.

New Material: Did the chapter cover or add sufficiently new material compared to the textbook content? If not what areas do you think need more attention? (50 Words)

Actually, this is a new chapter to talk about the spatio-temporal databases, which introduced time factor into the traditional spatial database. It is clear enough for introducing the spatio-temporal concept. If there are some real life examples added in this chapter, it could be better.

Comprehensive: Was the book chapter content presented comprehensive? Did it cover all major developments in the sub-area of the topic? If not what topics need to be added? (50 Words)

The book chapter content presented is comprehensive, and gave an good introduction for spatio-temporal database.

Presentation Critique: Rate the talk on a scale of 0(poor) to 10 (excellent) and provide a brief justification (50 Words) while suggesting areas for improvement on the following:

- Was the talk accessible to an "intelligent lay person"? Yes
- Did the talk emphasize a central message that conveys the overall value of the work being executed? Yes, it’s clear.
- Did the talk attempt to relate to the audience and showed effort in conveying key ideas clearly? Yes
- Was the speaker's response to questions satisfactory? Yes.

The speaking was doing very well to give an brief introduction of the spatio-temporal databases, and the graphs used in the slides to illustrate the concepts are helpful. I would rate 9 for this group.
